THIN SOLID FILMS VOLUME 233, NUMBERS 1–2, OCTOBER 12, 1993

Contents

Preface ix

Organization x

Reflectance Anisotropy

New developments in spectroellipsometry: the challenge of surfaces 1
D. E. Aspnes (Raleigh, NC, USA)

Reflectance anisotropy spectroscopy: a new method for semiconductor surface chemistry investigation 9
V. L. Berkovits (Saint Petersburg, Russian Federation) and D. Paget (Palaiseau, France)

Optical anisotropy of Ge(001) 14
H. Wormeester, D. J. Wentink, P. L. de Boeij and A. van Silfhout (Enschede, Netherlands)

Hydrogen-terminated Si(100) surfaces investigated by reflectance anisotropy spectroscopy 19
A. B. Müller, F. Reinhardt, U. Resch, W. Richter, K. C. Rose and U. Rossow (Berlin, Germany)

Optical anisotropies of Ag single crystals 24
T. Borensztein (Paris, France), A. Tadjeddine (Meudon, France), W. L. Mochan, J. Tarriba (Morelos, Mexico) and R. G. Barrera (Mexico, Mexico)

Full microscopic treatment of the optical response of the Si(100) 2×1 surface 28
C. M. J. Wijers, G. P. M. Poppe, P. L. de Boeij, H. G. Bekker and D. J. Wentink (Enschede, Netherlands)

Roughness—Electrochemistry

Ellipsometry in electrochemistry: a spectrum of applications 32
R. Greef (Southampton, UK)

The surface roughness and optical properties of high quality Si epitaxial layers 40
V. Nayar, C. Pickering, A. J. Pidduck, R. T. Carline, W. Y. Leong and D. J. Robbins (Malvern, UK)

Ex situ variable angle spectroscopic ellipsometry studies of electron cyclotron resonance etching of $Hg_{1-x}Cd_xTe$ 46
G. J. Orloff (Dallas, TX, USA), J. A. Woollam, P. He, W. A. McGahan (Lincoln, NE, USA), J. R. McNeill, R. D. Jacobson (Albuquerque, NM, USA) and B. Johs (Lincoln, NE, USA)

Estimation of the quality of polished optical glass surfaces by spectral ellipsometry 50
J. Hrdina (Praha, Czech Republic)

Experimental roughness excitation of surface electromagnetic waves and their detection by ellipsometry 53
M. Gauch and G. Quentel (Marseille, France)

Characterization of different conversion coatings on aluminium with spectroscopic ellipsometry 58
J. De Laet, J. Vanhellemont, H. Terryn and J. Vereecken (Brussels, Belgium)

Anodic oxidation of aluminium in sulphuric acid monitored by *ex-situ* and *in-situ* spectroscopic ellipsometry 63
R. Kötz, B. Schnyder and C. Barbero (Villigen, Switzerland)

Spectroscopic ellipsometry of carbon electrodes during electrochemical activation 69
R. Kötz, C. Barbero, B. Schnyder and O. Haas (Villigen, Switzerland)

Ellipsometry of iron hydrous oxide layers formed by potentiodynamic techniques 74
J. O. Zerbino, O. L. Bulhoes, S. Juanto, M. I. Miguez, J. R. Vilche and A. J. Arvia (La Plata, Argentina)

Ellipsometry and electron diffraction study of anodically formed Pd oxide layers 77
A. E. Bolzán, J. O. Zerbino, E. Macchi and A. J. Arvia (La Plata, Argentina)

Ellipsometric study of hydrous gold oxide layers and gold surfaces resulting from their electroreduction 82
M. E. Vela, J. O. Zerbino and A. J. Arvia (La Plata, Argentina)

Effect of anisotropy on microellipsometry in the Ti/TiO_2 system 86
A. Michaelis and J. W. Schultze (Dusseldorf, Germany)

Optical spectra of a conducting polymer (polymethyl-3-thiophene) at several stages of the electrodeposition process 91
C. Tian, G. Jin, F. Chao, M. Costa (Meudon, France) and J. P. Roger (Paris, France)

Elsevier Sequoia

Semiconductors and Microelectronics

Applications of spectroscopic ellipsometry to microelectronics 96
E. A. Irene (Chapel Hill, NC, USA)

Modulated ellipsometry for characterization of multiple quantum wells and superlattices 112
J.-Th. Zettler (Berlin, Germany), H. Mikkelsen (Aachen, Germany), Th. Trepk (Berlin, Germany), K. Leo, H. Kurz (Aachen, Germany) and W. Richter (Berlin, Germany)

Ion-implantation-caused special damage profiles determined by spectroscopic ellipsometry in crystalline and in relaxed (annealed) amorphous silicon 117
T. Lohner, M. Fried, J. Gyulai (Budapest, Hungary), K. Vedam, N. V. Nguyen (University Park, PA, USA), L. J. Hanekamp and A. van Silfhout (Enschede, Netherlands)

Temperature dependence of the dielectric function and interband critical points of AlAs obtained on an MBE grown layer 122
M. Garriga, M. Kelly and K. Ploog (Stuttgart, Germany)

In-situ dual-wavelength and *ex-situ* spectroscopic ellipsometry studies of strained SiGe epitaxial layers and multi-quantum well structures 126
C. Pickering, R. T. Carline, D. J. Robbins, W. Y. Leong (Malvern, UK), D. E. Gray and R. Greef (Southampton, UK)

Determination of porous silicon film parameters by polarized light reflectance measurements 131
P. Basmaji, V. S. Bagnato, V. Grivickas, G. I. Surdutovich and R. Vitlina (São Carlos, Brazil)

Circular birefringence in zinc-blende-type semiconductors 137
P. Etchegoin and M. Cardona (Stuttgart, Germany)

Piezo-optical response of semiconductors 141
P. Etchegoin, J. Kircher and M. Cardona (Stuttgart, Germany)

Spectroscopic ellipsometry: a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ on InP in the wavelength range from 280 to 1900 nm 145
H. W. Dinges, H. Burkhard, R. Lösch, H. Nickel and W. Schlapp (Darmstadt, Germany)

Determination of accurate critical-point energies, linewidths and line shapes from spectroscopic ellipsometry data 148
J. W. Garland, C. C. Kim, H. Abad and P. M. Raccah (Chicago, IL, USA)

Si- and Ge-like features in the dielectric function of Si_nGe_m superlattices 153
J. C. Jans, R. W. J. Hollering, D. J. Gravesteijn and C. W. Fredriksz (Eindhoven, Netherlands)

Spectroscopic ellipsometry of strained $Si_{1-x}Ge_x$ layers 158
M. Líbezný, J. Poortmans, M. Caymax, A. Van Ammel (Leuven, Belgium), J. Kuběna, V. Holý (Brno, Czech Republic) and J. Vanhellemont (Leuven, Belgium)

Dielectric function of GaAs/AlAs superlattices grown on GaAs substrates with different orientation 162
F. Lukeš (Brno, Czech Republic) and K. Ploog (Berlin, Germany)

Temperature dependence of the dielectric function of silicon using *in situ* spectroscopic ellipsometry 166
G. Vuye, S. Fisson, V. Nguyen Van, Y. Wang, J. Rivory and F. Abelès (Paris, France)

Non-destructive characterization of III–V alloy multilayer structures using spectroscopic ellipsometry 171
C. Pickering, R. T. Carline (Malvern, UK), N. S. Garawal (Guildford, UK), J. L. Stehlé, J. P. Piel (Bois-Colombes, France), R. Blunt (Cardiff, UK) and P. Kirby (Towcester, UK)

Thin epitaxial films of wide-gap II–VI compounds studied by spectroscopic ellipsometry 176
U. Rossow, T. Werninghaus, D. R. T. Zahn, W. Richter and K. Horn (Berlin, Germany)

Ellipsometric characterisation of InP-based quantum well structures 180
U. Rossow, A. Krost, T. Werninghaus, K. Schatke, W. Richter, A. Hase, H. Künzel and H. Roehle (Berlin, Germany)

Temperature dependence of the dielectric function and the interband critical-point parameters of GaP 185
S. Zollner, M. Garriga, J. Kircher, J. Humlíček, M. Cardona (Stuttgart, Germany) and G. Neuhold (Erlangen, Germany)

Detection and characterization of transient surface periodic structures formed during pulsed-laser annealing of semiconductor surfaces by ellipsometry 189
D. J. Brink and J. E. Smit (Pretoria, South Africa)

Spectroscopic transmission ellipsometry studies of intersub-band transitions in n-GaAs/$Al_{0.3}Ga_{0.7}As$ quantum wells ... 194
K. B. Ozanyan and O. Hunderi (Trondheim, Norway)

Non-destructive depth profiling of silicon ion implantation induced damage in silicon (100) substrates 199
S. Lynch, M. Murtagh, G. M. Crean, P. V. Kelly, M. O'Connor (Cork, Ireland) and C. Jeynes (Guildford, UK)

Spectroscopic ellipsometry study of the relaxation state of amorphous silicon 203
R. Reitano, M. G. Grimaldi, P. Baeri (Catania, Italy), A. Borghesi (Modena, Italy) and A. Sassella (Pavia, Italy)

An ellipsometric investigation of ion implanted silicon 207
G. Popescu and I. Boca (Bucharest, Romania)

Optimization of the polycrystalline silicon-on-silicon dioxide characterization using spectroscopic ellipsometry 210
L. M. Asinovsky (Flanders, NJ, USA)

Characterization of silicon on insulator multilayers using *ex situ* spectroscopic ellipsometry and *in situ* monochromatic ellipsometry during plasma etching 214
R. Greef, D. E. Gray, N. J. Dartnell, J. Zhu (Southampton, UK), S. Lynch and G. M. Crean (Cork, Ireland)

Spectroellipsometry characterization of directly bonded silicon-on-insulator structures 218
M. E. El-Ghazzawi, T. Saitoh, N. Hori, A. Sakai and T. Oka (Tokyo, Japan)

Study of thin films of transparent electronic materials by phase-modulated spectroellipsometry 223
J. Campmany, A. Canillas, J. L. Andújar, J. Costa and E. Bertran (Barcelona, Spain)

Ellipsometric characterization of hydrogen-rich oxynitride films 227
A. Borghesi (Modena, Italy), A. Sassella (Pavia, Italy) and S. Rojas (Agrate, Italy)

Investigation of the system InSb–SiO_2 by spectroscopic multiangle ellipsometry 231
S. Russev, E. Valcheva and K. Germanova (Sofia, Bulgaria)

Characterization of SiO_2–GaAs interface structures using spectroscopic ellipsometry 236
Y. Watanabe, T. Saitoh, M. Miyazaki and K. Suzuki (Tokyo, Japan)

The influence of temperature and pressure on the structure of remote plasma enhanced chemically vapour deposited SiO_2 investigated by spectroscopic ellipsometry 240
B. Gruska and K. Wandel (Berlin, Germany)

In Situ Characterization—Nucleation and Growth

Real time spectroscopic ellipsometry for characterization of nucleation, growth, and optical functions of thin films 244
R. W. Collins, I. An, H. V. Nguyen and Y. Lu (University Park, PA, USA)

Electron cyclotron resonance etching of semiconductor structures studied by *in-situ* spectroscopic ellipsometry 253
S. Nafis, N. J. Ianno, P. G. Snyder, W. A. McGahan, B. Johs and J. A. Woollam (Lincoln, NE, USA)

Ellipsometry study of the adhesion of dielectric thin films on polymer substrates 256
S. Vallon, B. Drévillon (Palaiseau, France) and J. C. Rostaing (Les Loges en Josas, France)

Study of CaF_2 growth on Si, a-SiO_2 by *in situ* spectroscopic ellipsometry 260
J. Rivory, S. Fisson, V. Nguyen Van, G. Vuye, Y. Wang, F. Abelès (Paris, France) and K.-Y. Zhang (Noisy le Grand, France)

Spectroellipsometric study of the growth and phase transitions of a two-dimensional metal: Pb on Ge(111) 264
M. Abraham (Mainz, Germany) and G. LeLay (Marseille, France)

In situ ellipsometry of soft X-ray multilayer fabrication 268
M. Yamamoto and A. Arai (Sendai, Japan)

Analysis of critical points in semiconductor optical functions from *in situ* and real-time spectroscopic ellipsometry 272
H. V. Nguyen and R. W. Collins (University Park, PA, USA)

Hydrogen diffusion and reaction processes in thin films investigated by real time spectroscopic ellipsometry 276
I. An, R. W. Collins, H. V. Nguyen, K. Vedam, H. S. Witham and R. Messier (University Park, PA, USA)

Study by real time ellipsometry of the growth of amorphous and microcrystalline silicon thin films combining glow discharge decomposition and UV light irradiation 281
N. Layadi, P. Roci i Cabarrocas, V. Yakovlev and B. Drévillon (Palaiseau, France)

Ellipsometry study of non-uniform lateral growth of ZnO thin films 286
S. Pittal, P. G. Snyder and N. J. Ianno (Lincoln, NE, USA)

Ellipsometric studies on the oxidation of thin copper films 289
M. Rauh, P. Wißmann and M. Wölfel (Erlangen, Germany)

Real-time monitoring and control during MOVPE growth of CdTe using multiwavelength ellipsometry 293
B. Johs, D. Doerr, S. Pittal (Lincoln, NE, USA), I. B. Bhat and S. Dakshinamurthy (Troy, NY, USA)

In situ ellipsometric study of the influence of powder formation on the initial growth of glow discharge a-Si:H 297
U. I. Schmidt, B. Schröder and H. Oechsner (Kaiserlautern, Germany)

The fastest real time spectroscopic ellipsometry: applications and limitations for *in situ* and quality control 301
J.-P. Piel, J.-L. Stehle and O. Thomas (Bois-Colombes, France)

Part 2 appears as Vol. 234/1–2
